

Stock Moldings allow checks and splits in ends. Figure usable length is 12" less than stated length. If you need a good 10', please order a 12' length.

Some items are new and will not be available in QOE until the next catalog update. These items can be added by \$SQIACC and obtaining the list price from customer service.

NOTES

Molding and Trim

- Stock items are available on shorter lead times while Custom items may take several weeks to ship. This information becomes important if additional items are required after delivery, in order to complete the job. If your order includes Custom items, please be sure of your quantity and when in doubt, please order an extra piece. This will ensure that the job will not suffer delay due to Molding shortage.
- The standard length for molding is either nominal 8' or 10' depending on the profile. Other lengths are available so that mid run seams may be avoided. Pricing for this varies. Please contact customer service if you have a need for longer lengths.

Shipping

The maximum length that can be shipped via FedEx or UPS is 92". Molding ordered over 92", and scheduled to ship in one of these methods, will be cut to 92" and send the fall-off. Other cut sizing is available, provide specific instructions.

Radius

Only certain profiles are available in a radius. Please be sure that you keep to these profiles when working with radius cabinets. The profiles available in a radius will be noted

Wood Species

When selecting molding profiles, please consult the wood specie availability chart to be sure the desired profile is available in the intended species.

- Bamboo has limited profiles, as do the decorative inserts rope, dentil and egg and dart.
- Rustic Knotty species is not available on any molding profiles other than fillers. Please use the regular species for the moldings.
- Solid wood moldings for exotic wood species may be available. Please contact customer service with your specific request.

Carved Wood Moldings

In addition to the items shown in this section, please see section 3 for additional carved corbels. We also offer carved wood moldings from sources such as Enkeboll, Art for Everyday, Hardware Resources, and Hafele on a quote basis. Please contact customer service for pricing on particular items.

Top Mount

Top Mounted crown moldings are highlighted through this section. These crown moldings are best suited for use with Frameless cabinetry, or Framed cabinetry with full overlay doors. Another option for framed full overlay is to use the RDH modification which reduces the overlay at the top to allow for molding application. Be aware that some moldings require a mounting plate for top mount installation. The mounting plate must be ordered separately in some cases.

Filler Strips (SOLID STOCK)

FS

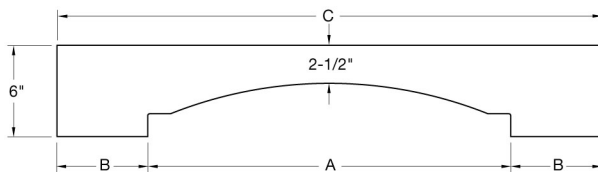

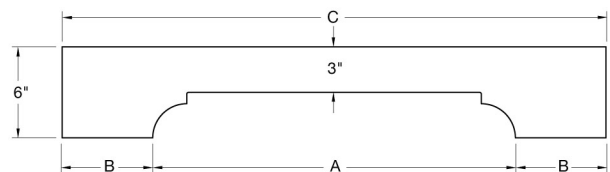

- Fillers have one face and one long edge finished as standard.
- Fillers can be ordered up to 10' long on stock.
- Face and all edges can be finished as an option in the prompt.
- Minimum width is 1.5"
- Cannot receive weathered grain treatment – use OLFS if you need weathered grain

OVERLAY FILLERS

OLFS

- Fillers have one face and one long edge finished as standard.
- Fillers can be ordered up to 10' long on stock.
- Face and all edges can be finished as an option in the prompt.
- Minimum width is 1.5"

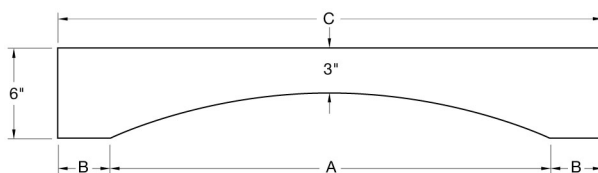

- Fillers can be ordered with any edge profile shown on 1.48.
- QOE prompt allows specification of edges to be profiled and profile shape.

CLASSIC ARCH VALANCE**ELEGANT ARCH VALANCE**

Be sure to consult the valance matrix on the following page.
This will provide you with the minimum and maximum sizes
And other dimensional information.

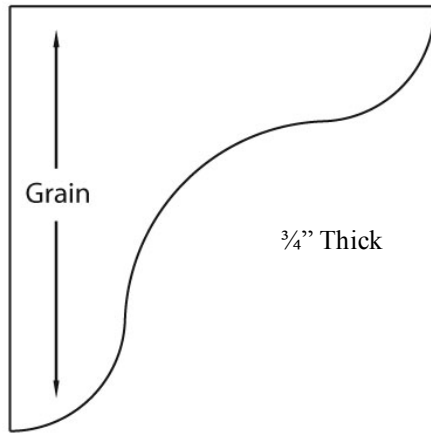

VSTR	Valance - Straight
VRARCH	Valance - Roman Arch
VCARCH	Valance - Classic Arch
VEARCH	Valance - Elegant Arch

- Valances are always 6" high and finished on front, back, and patterned long edge.
- Straight valance edge profile will match door profile.
- Roman Arch available with B-2, C-2, E-2, H-2, J-2, L-059, L-120, L-149, L-281, L-382, L-772, L-803, L-1160, LC-2, PRS-2, RC-2, and V-2.
- Classic Arch and Elegant Arch available with machine edge only.

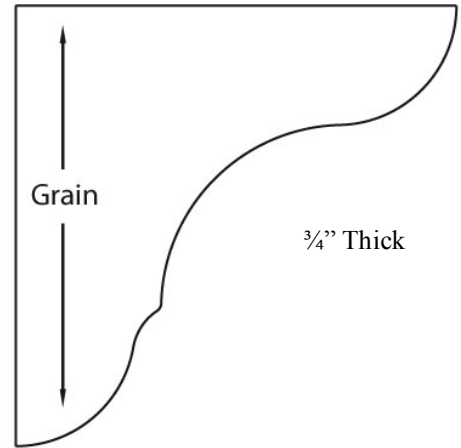

ROMAN ARCH VALANCE**STRAIGHT VALANCE**

KBBC9	9x9 KBB bracket w/ mounting cleats
KBBC12	12x12 KBB bracket w/ mounting cleats

Mounting Cleats are available

- 3/4" x 3" sized 1-1/2" longer than the bracket
- Machine edge on long edges and one short edge
- B-2 Edge on short leading edge

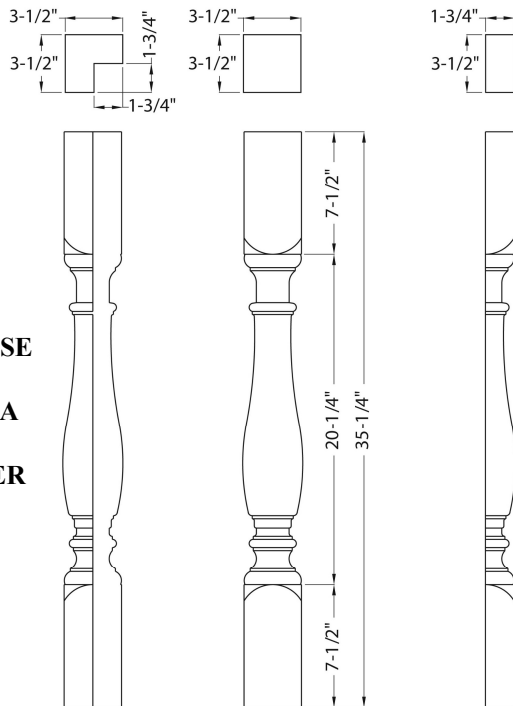

Legs, Corbels, and Accents

- Most of these items are available in QOE in the following wood species:
- Paint Grade, Hard Maple, Cherry, and Red Oak.
- Other wood species are available custom and must be quoted.
- All finish types are available.
- If you prefer to use items from an outside vendor, please email customer service for a price.
- Customer service will need to know the vendor, item, finish, and quantity.
- The \$SQIMOLDING sku can be used to enter the custom item in QOE.
- We do not allow items to be purchased direct and sent to us for finishing.

This process ends up causing production delays.

- We work with many outside carving vendors such as:
 - Enkeboll
 - Art for Everyday
 - Osborne Wood Products
 - Brown Wood Inc.
 - Classic Designs
 - Adams Wood Products
 - White River

- Not available in Rustic Knotty species
- All 3/4" panel raised and framing beads are available
- Square machine edge only

FURNITURE BASEBOARD

Wellsford Cabinetry Furniture Baseboard is a decorative trim that provides you with a means of creating a furniture appearance without complicating the installation. Using our furniture base in conjunction with the Prep for Furniture Toe option will allow the installer to shim the cabinet level during installation. The toekick cover will conceal the gap created by the shim, and the Furniture Baseboard is mounted on the extended bottom rail of the cabinet. We have found this method to work well mechanically, and the furniture baseboard gives a finer appearance compared to cutting the design into a flush toekick.

- Furniture baseboard is available in both Beaded Base 381 and Colonial Base 28. Please specify your selection.
- The left end of the furniture base is illustrated. An identical cut will be on the right end.
- Please specify the length of the piece. Be sure to leave enough material to make miter cuts on the end for the returns.

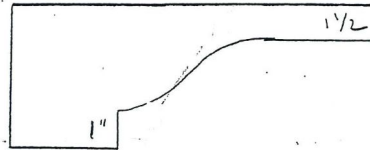

Example:

- Attach cabinets together, shim and mount to the floor.
- Run furniture baseboard on the working sides of the island, and regular baseboard on the seating side.
