Wainscot Panels

A Wainscot Panel is a series of doors built together.

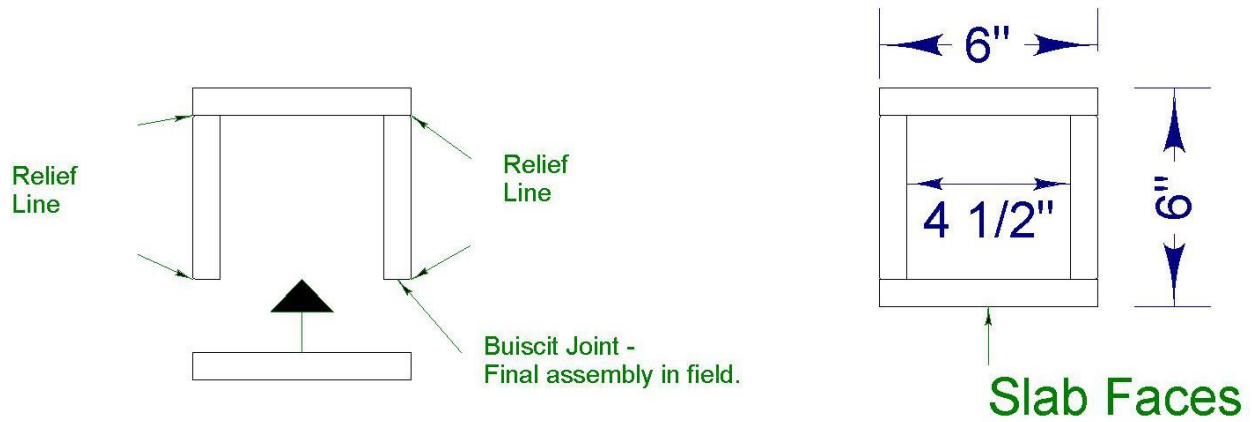

INTEGRAL		FRAME & DOOR
WSCTA-W	1 Panel	WSCTA-F&DW
WSCTB-W	2 Panel	WSCTB-F&DW
WSCTC-W	3 Panel	WSCTC-F&DW
WSCTD-W	4 Panel	WSCTD-F&DW
WSCTE-W	5 Panel	WSCTE-F&DW
WSCTF-W	6 Panel	WSCTF-F&DW
WSCTG-W	7 Panel	WSCTG-F&DW

Wainscot Panel Notes:

- Please consult the Door Manual to verify that the particular door style is available as a Wainscot Panel, all Mortise & Tenon styles are available..
- The sizes of the stiles and rails can be changed, but may increase the cost. Please request a quote.
- Standard pricing includes stiles and rails up to 8 3/4" in width, and overall panel size may not exceed 50" in both width and height. 50" can be exceeded in one direction, up to 119".
- Stiles and rails over 2 5/16" wide may utilize framing material containing one or more glue joints.
- Dimensioned drawings are preferred with a quote request, and order, to ensure correct price, and order entry.
- Finished Wainscot panels will have the face and all exterior edges stained and top-coated. The back of the panel will receive only a clear sealer coat unless the finished back option is selected.

Framed Appliance Panel on 1/4" Panel

Reveal varies as per appliance specs.

Amesbury Door Shown

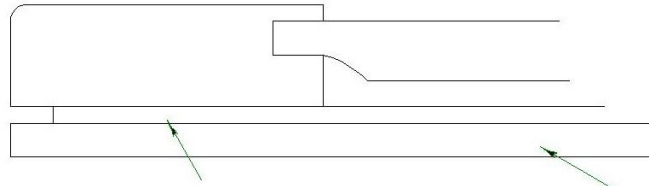

This is a cross-section of a framed appliance panel. The 1/4" plywood panel is meant to be inserted into a metal frame that is provided with the appliance. The size of the overall panel will vary. Please consult the spec sheets for the particular appliance before ordering.

Please use the supplemental order form along with including the item on the Panel Order Sheet. Please include the make & model # of the appliance. Grille Panels are not included in the standard front panel price. You must order it separately. If your refrigerator falls between the available sizes, use the next larger size for pricing.

Full Overlay Appliance Panels

Amesbury Door Shown

Spacer Panels as required per appliance specs

1/4" Plywood Backpanel

This is a cross-section of a full overlay appliance panel.

The 1/4" plywood panel is meant to be inserted into a metal frame that is provided with the appliance.

The door front extends to cover the face of the metal frame.

The size of the overall panel, spacer panel, and door front will vary. Please consult the spec sheets for the particular appliance before ordering.

Please use the supplemental order form along with including the item on the Panel Order Sheet.

Please include the make & model # of the appliance.

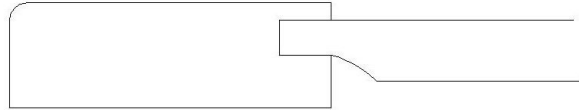

Grille Panels are not included in the standard front panel price. You must order it separately.

If your refrigerator falls between the available sizes, use the next larger size for pricing.

Integrated Appliance Panels

Amesbury Door Shown

This is a crossection of an integrated appliance panel.

The ¾” door is to be fastened to the face of the appliance using fasteners provided by the appliance manufacturer. Decorative hardware must be used.

The size of the door front will vary. Please consult the spec sheets for the particular appliance before ordering.

Please use the supplemental order form along with including the item on the Panel Order Sheet.

Please include the make & model # of the appliance.

Grille Panels are not included in the standard front panel price. You must order it separately.

If your refrigerator falls between the available sizes, use the next larger size for pricing.

Integrated Frame & Door Appliance Panels

Amesbury Door Shown

1/4" BEADED INSET APPLICATION SHOWN

Panels size as required
per appliance specs

This is a cross-section of a Frame & Door integrated appliance panel. The 3/4" door is to be fastened to the face of the appliance using fasteners provided by the appliance manufacturer. In some cases a particular appliance has attachment points that fall in the joint between the frame and door. In this case, we suggest ordering the panel with an increased framing size. Please be sure to check the spec sheets to determine if you need to make changes.

Decorative hardware must be used.

The size of the door front will vary. Please consult the spec sheets for the particular appliance before ordering.

Please use the supplemental order form along with including the item on the Panel Order Sheet.

Please include the make & model # of the appliance.

Grille Panels are not included in the standard front panel price. You must order it separately.

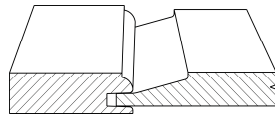

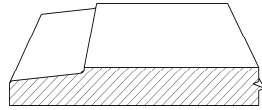

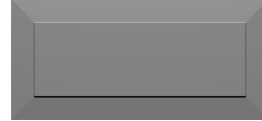

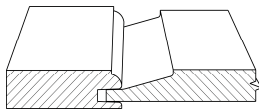

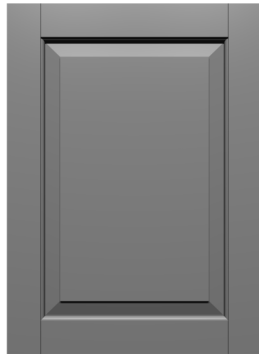

If your refrigerator falls between the available sizes, use the next larger size for pricing.

Beaded Inset style is shown. Other styles using a frame & door are Plain Inset, and 3/8" Inset.

Back of panel is finished 1" in from all edges. Please be sure to size your panel accordingly or unfinished surfaces will be exposed. Extending the panel up on a Sub-Zero 700 series will reveal the scab and an unfinished surface. If you need to extend the top of the panel, we suggest using a plain integrated appliance panel, not an integrated frame & door.

REF-IFDAP	REFRIGERATOR DOOR Integrated Frame & Door
FZR-IFDAP	FREEZER DOOR Integrated Frame & Door
D/W-IFDAP	DISHWASHED DOOR Integrated Frame & Door
GRILLE-SDF-IFDAP	GRILLE (Match SDF) Integrated Frame & Drawer Front
GRILLE-LDF-IFDAP	GRILLE (Match LDF) Integrated Frame & Drawer Front
WC-IFDAP	WINE COOLER DOOR Integrated Frame & Door

Single Doors and Drawer Fronts

Doors Available:
7 1/2" to 26" Wide

See Below for Available Heights

Drawers Available:
7 1/2" to 48" Wide

See Below for Available Heights

DOOR-SP	SINGLE PANEL DOOR - 8" to 48" High
DOOR-DP	DOUBLE PANEL DOOR - 36" to 83" High
DRAWERHEAD-SDF	MATCH SMALL DRAWER HEAD - 4" to 12" High
DRAWERHEAD-LDF	MATCH LARGE DRAWER HEAD - 6" to 18" High
DRAWERHEAD-SLAB	SLAB DRAWER HEAD - 4" to 48" High, 96" long

Door and Drawer Front Notes:

- The doors will not be prepped for hinges.
- If you desire hinges, or want the door prepped for hinges, select in hinge drop down.
- Doors and Drawer Fronts are finished front, back, and 4 edges.

SHELVES

To order additional shelves, first select the type of shelf you want.

SHELFPB	¾" Particle Board Shelf
SHELFW-NF	¾" Plywood Shelf Natural Finish
SHELFW-MCF	¾" Plywood Shelf – Match Cabinet Finish

WIDTH	12" to 96"
THICKNESS	¾"
DEPTH	6" TO 30" Deep

Shelf Notes:

- Shelves will include the necessary shelf pins.
- Particle Board and Veneer (plywood) shelves are ¾".

Wood Countertops

To order a Wood Countertop, first make a dimensioned drawing.

WOODTOP-S	STRAIGHT
WOODTOP-L	“L” SHAPED
WOODTOP-D	“L” SHAPED W/ INSIDE DIAGONAL
WOODTOP-U	“U” SHAPED

AVAILABLE SIZES	6” TO 96” IN EITHER DIRECTION
-----------------	-------------------------------

Wood Countertop Notes:

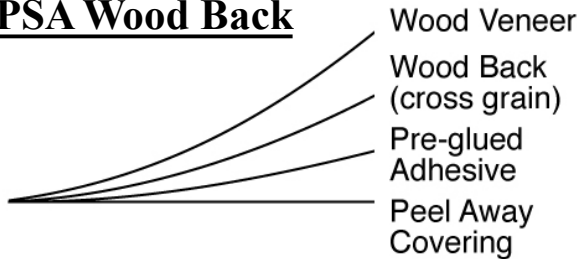

- Wood Countertops are constructed from $\frac{3}{4}$ ” thick fiber core veneer plywood.
- The top has a second $\frac{3}{4}$ ” strip for build-up, and a $\frac{3}{4}$ ” x $1\frac{1}{2}$ ” solid wood nose.
- Please submit a drawing and indicate the grain direction, finished edges, and dimensions.
- Countertops over 48 x 96 will need a seam.
- Wood countertop shipping via common carrier may incur additional charges.
- Some wood countertops may be too large to ship via common carrier.

VENEERS

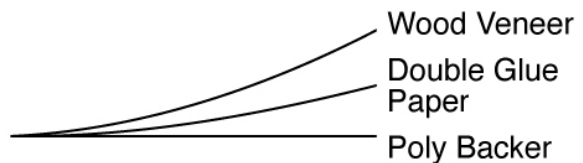

- All Veneers are approximately 1/32” thick (0.794 mm)
- One end and one side of veneer sheet is guaranteed to be free from physical damage.
- Wood back veneers have a cross grain wood backer.
- Poly back veneers are applied to a polymer resin impregnated membrane. They contain no added urea formaldehyde (NAUF), are rigid yet pliable and provide excellent moisture resistance.
- Wood back and poly back veneers are available with their applicable backer or a pressure sensitive adhesive (PSA). PSA veneers have a pre-glued adhesive layer protected by a peel coat covering that must be removed prior to application.
- Veneers are not guaranteed to perfectly match solid wood doors. Veneer is sliced from premium material; color and grain match will be more uniform than solid wood doors. Hickory veneers may contain mineral streaks and peck marks.
- Proper surface conditions and preparation is essential to successful application and performance of veneered surfaces.
 - Per manufacturer’s recommendations, veneers of all backer types should be placed flat and allowed to acclimate 48 hours before installation.
 - Pressure sensitive veneers should not be applied to bare wood, or surfaces covered with sanding sealers, high pressure laminates, melamine, or other plastic materials.
 - Wood back and poly back veneers are best applied with roller grade adhesives. Sufficient adhesive coverage on both the veneer and substrate surface will ensure proper adhesion and performance.
- Wellsford Cabinetry is not liable for product failure due to improper surface preparation, adhesive selection or installation technique.
- All veneers are available finished or unfinished.
