

Hoods can be made with an Alumasteel bottom for use with ventilation power packs.
Custom hoods and modifications are available. Please provide a sketch.
Flush finished sides are standard on all range hoods.

BLANK FOR NOTES

M-Series Range Hoods

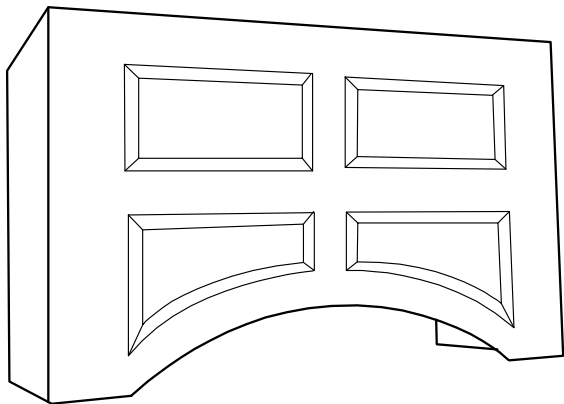

M Series hoods are available in standard widths to fit up to a 60" cook top. Custom widths and heights are available, custom depths are not.

The front panel is removable for easy installation.

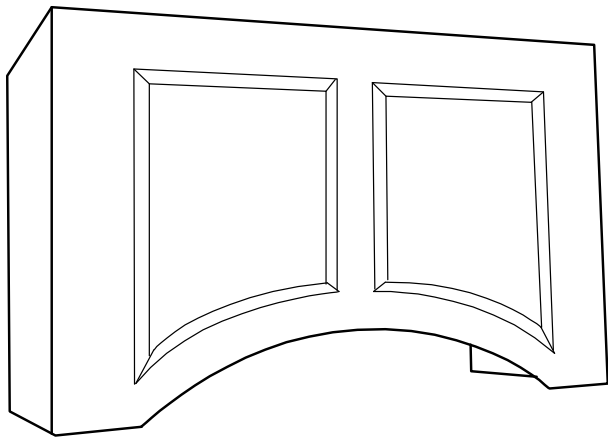

Both the Professional liner and the Professional Mesh liner will fit the M-Series Hood. Several sizes and blower combinations are available. Order ventilation equal to the width of the hood.

Some variations of the M Series include corbels. Please see pages 3.8, 3.9 and 3.10 for available designs.

Professional Mesh Series Ventilation (PML)

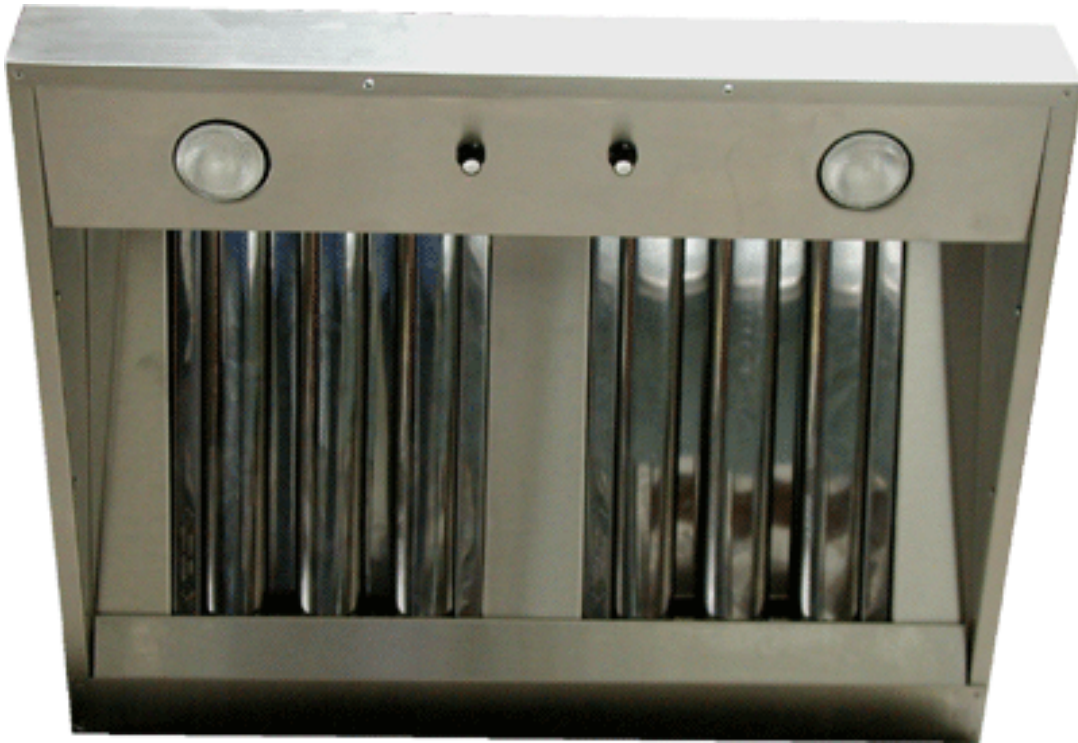

These powerful ventilation systems are manufactured using 22 gauge 303 series stainless steel, perforated stainless filter system, variable speed motor control and dimmer controlled halogen lighting. They are UL listed, and the filters are dishwasher safe.

Your choice of powerful blowers include internal 400, 600 or 1000 CFM, remote 600, 1200 or 1500 CFM, or a 1000 CFM inline. Several standard size liners include widths of 28-3/8" (30"), 34-3/8" (36"), 40-3/8" (42"), 46-3/8" (48"), 52-3/8" (54"), 58-3/8" (60"). Custom sizes are available.

30", 36", & 42" wide liners have 2 halogen lights. Larger widths have 3 lights.

Professional Baffle Series Ventilation (PSL)

These powerful ventilation systems are manufactured using 22 gauge 303 series stainless steel, a polished stainless steel baffle filter system, variable speed motor control and dimmer controlled halogen lighting. They are UL listed, and the filters are dishwasher safe.

They employ double wall construction. Your choice of powerful blowers include internal 400, 600 or 1000 CFM, external 600, 1200 or 1500 CFM, or 1000 CFM inline. Several standard size liners include widths of 28-3/8" (30"), 34-3/8" (36"), 40-3/8" (42"), 46-3/8" (48"), 52-3/8" (54"), 58-3/8" (60") with a 22-1/2" depth. Custom sizes are available. Professional Ventilators can be used with most hoods.

If ordered with arched bases on the G,T,I,E,W,H,S,J ,or A, the base height will be increased by 2". This is done at no charge.

30", 36", & 42" wide liners have 2 halogen lights. Larger widths have 3 lights.

Professional Series Ventilation

Duct height centered in hood 2" off the wall

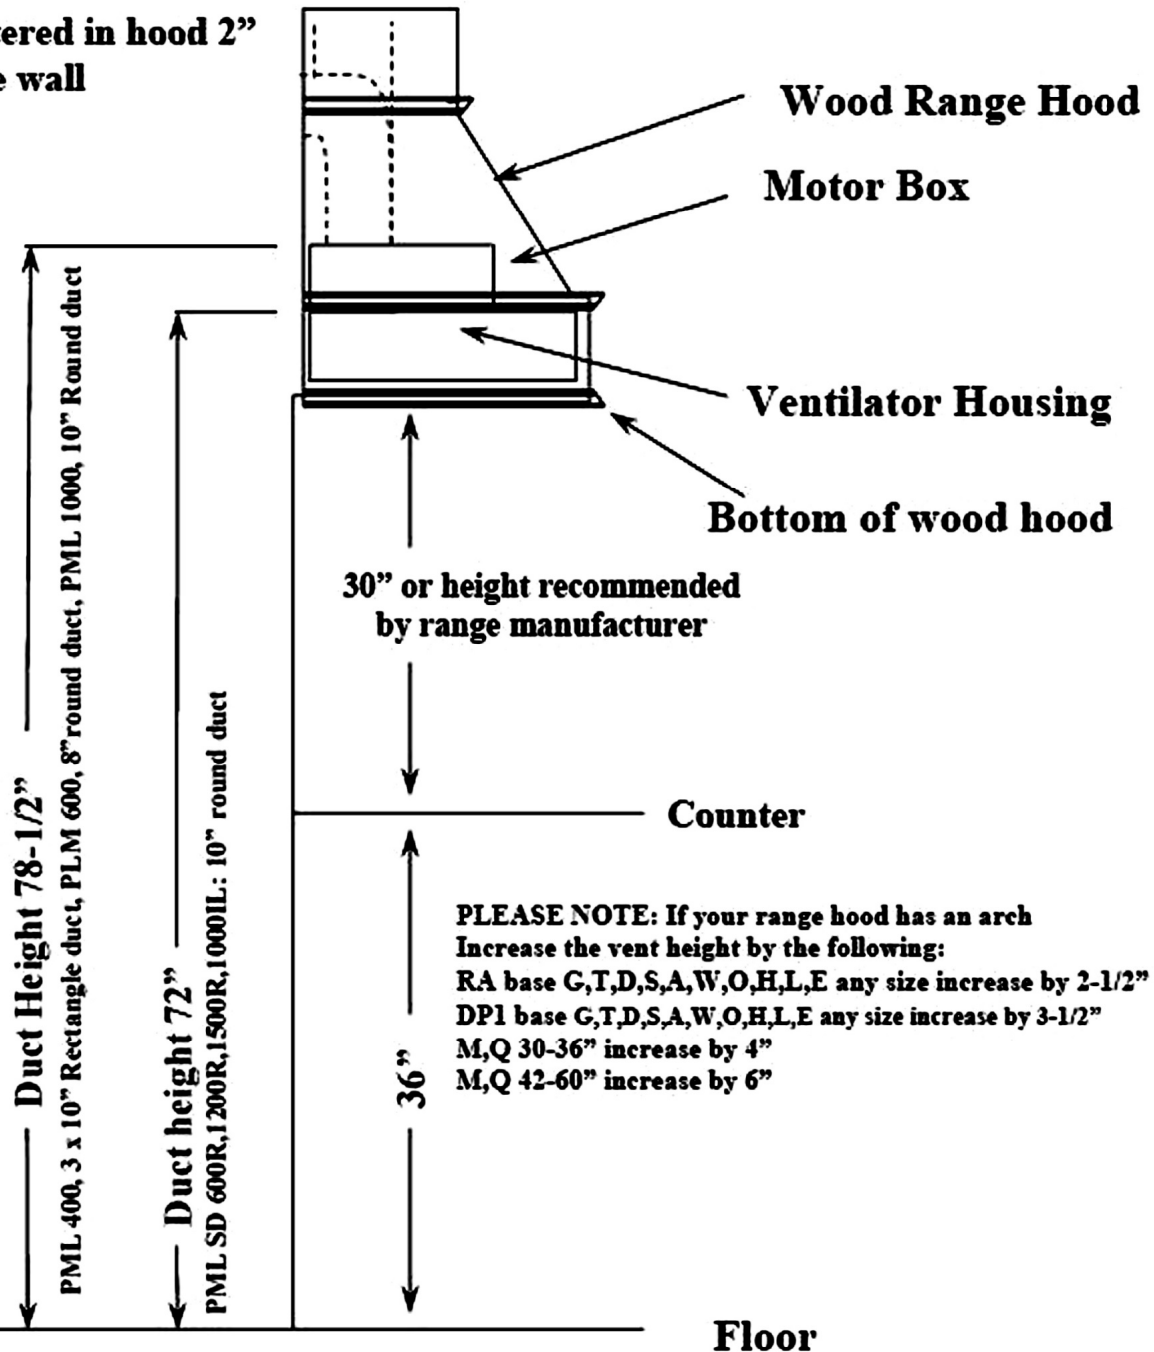

Diagram depicts Professional Mesh Liner, increase installed duct heights on the Professional Baffle Liner by 2-3/4"

Please note some cooktops require the range hood to be mounted higher than 30", see manufacturers specifications

****Please check your local building code before placing an order. Range Hoods and Liner ventilators are subject to local building codes. It is your responsibility to ensure Stanisci Design Wood Range Hoods and liner/ventilators meet your local building code and/or the appliance manufacturers specifications.**

We strongly suggest that you purchase the wood hood with the ventilation unit. This will assure you that the liner and vent work in the space within the hood.

All orders for hoods with ventilation will include a secondary in-line damper that must be used to form an air lock between the hood and the outside. This will greatly reduce the natural movement of air between areas of colder and warmer temperatures.

Please be sure to check the available room for ductwork.

Internal 400 CFM	3"x10" rectangle
Internal 600 CFM	8" round
Internal 1000 CFM	10" round
In-line 1000 CFM	10" round
External 600 CFM	10" round
External 1200 CFM	10" round
External 1500 CFM	10" round

Always be sure to check your local building code and follow the appliance recommendations for ventilation and distance to combustible surfaces.

Ventilation units are covered by a 2-year in home warranty from the manufacturer, Modernaire.

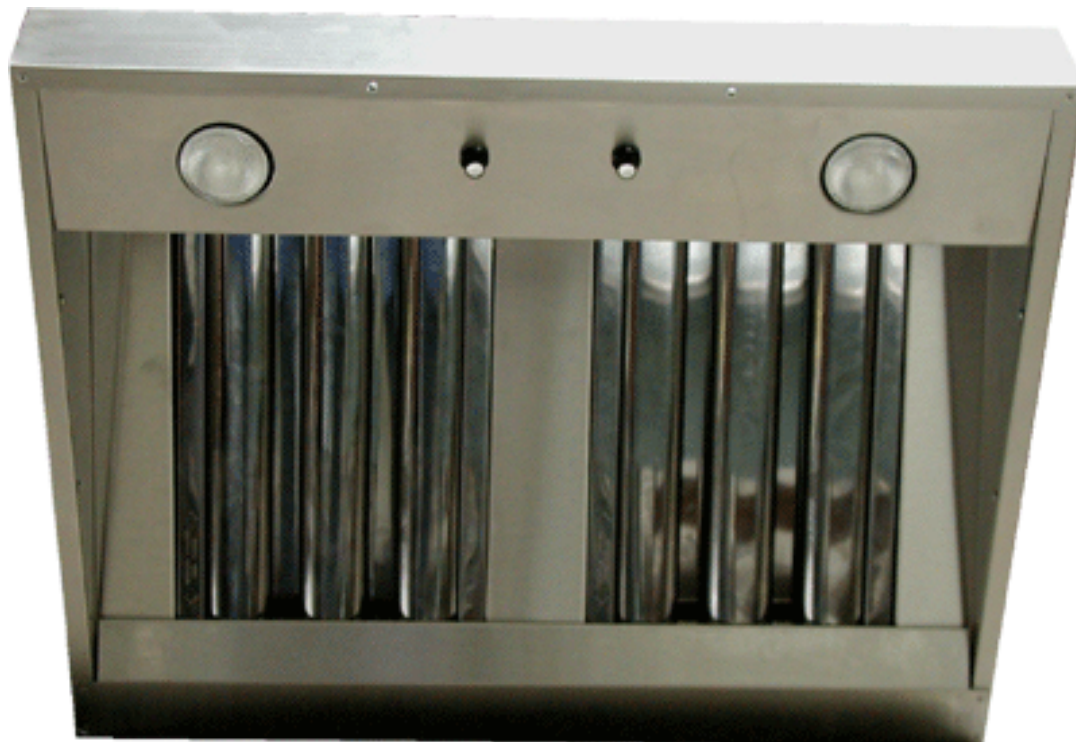

External blowers are superior to internal or in-line units because they pull the air through the duct, rather than push it. External units also reduce the overall system noise since the motor is located outside the home. To further minimize the noise, keep the duct run as straight as possible.
