Thank you for choosing Wellsford Cabinetry!

This updated **Door Selection Guide** provides information on our offerings, price levels, minimum sizing, and dimensional details for standard doors.

Custom Door Styles: Door styles can be created to suit specific requirements. If you have interest to match something specific, please contact the **order desk**. We will be happy to review how we can accommodate your request.

Wood Species: Most door styles are available in a variety of woods. These selections can be found on the wood species availability list found in the Species & Finishes section of the Wellsford Cabinetry catalog. Bamboo and rustic knotty selections will have some exceptions. Please refer to your sample library to determine the possible finishes for each door style. Many door styles have other wood species available on an as needed basis. Contact the **order desk** for your specific requirements.

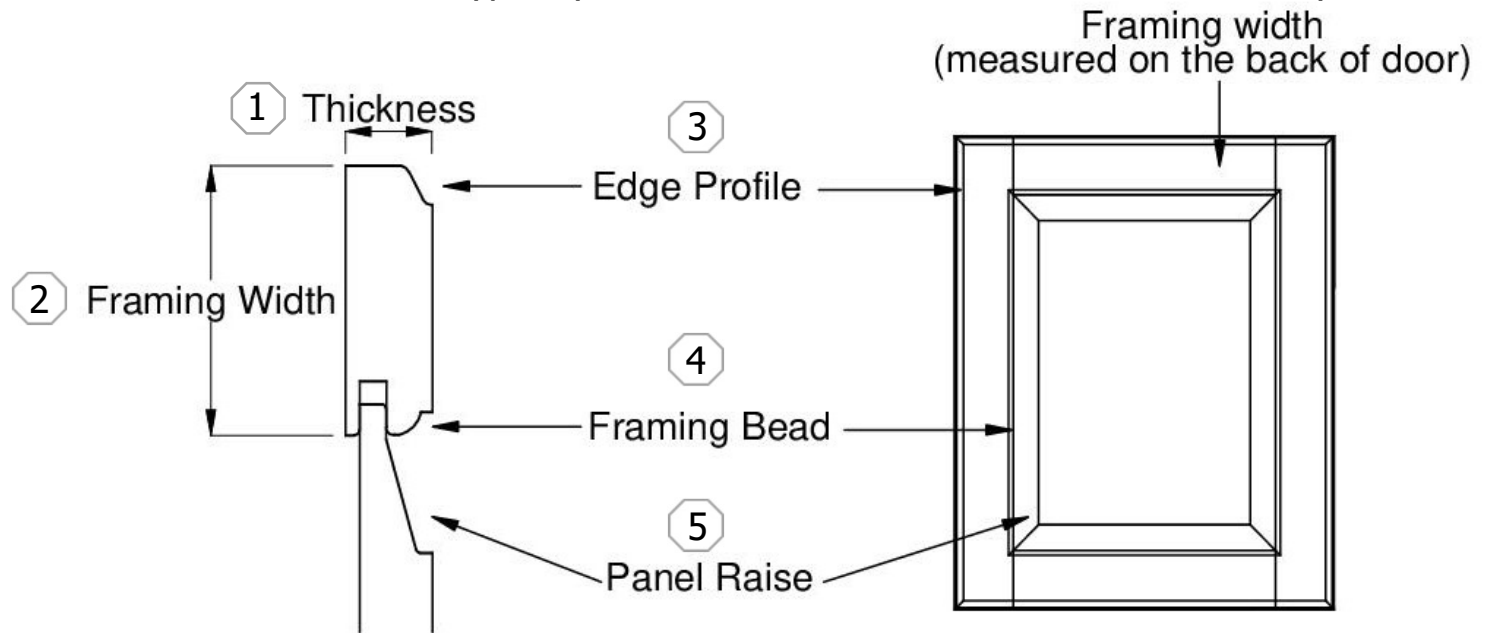

Overlays: All wood door styles can be ordered in framed 1/2" standard overlay and frameless full overlay. Other overlays and insets are available as noted on the specification page for each door. Alternative Materials styles are frameless full overlay only.

Inset: A variety of inset options are available on most mortise & tenon door styles. Details are included on the specification page for each door. Inset doors have soft-close concealed hinges. Exposed hinges are available by quote only.

Sizing: Size restrictions for each door will vary. The minimum sizing is critical when small width cabinets are necessary in a design. In general, for below minimum widths, we try to maintain the framing size of the standard door and vary the left to right overlay. The maximum width for a single panel door is 24". Mortise & tenon doors over 24" wide will be 2 panel. For doors with side mount hinges, maximum width is 24". For top mount hinges, maximum width door is 48". Minimum heights are listed on each door style page, but may vary with hinging. The maximum height for a mortise and tenon door with a single panel is 48" high. Mortise and tenon doors over 48" high will be 2 panels to stay in warpage warranty. Mitered doors over 48" high will be 1 panel and will not be covered for warpage. The tolerance for any door or drawer front is +/- 1/32" in width and height.

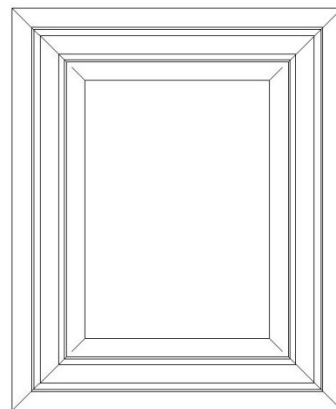

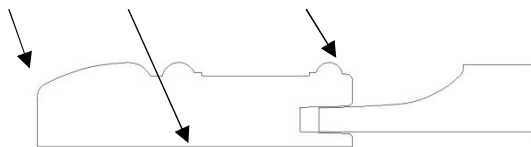

Mortise & tenon doors typically have five details that determine the door style.

Mitered door styles cannot have custom framing width, edge profiles or framing beads. These details are part of the cutter that makes the door style. The panel raise can be customized.

Cannot be changed on mitered styles

Given the nature of mitered products, multiple panel products such as wainscot are not available, nor are integral wainscot sides. Sometimes, a mortise and tenon design with some similar details can be used. Contact the **order desk** for assistance.

Drawer heads: Each door style is available with several drawer head designs shown on the specification page. Five piece drawer heads are available for most door styles. Some drawer heads are not available in 3/8" partial inset. It is possible to use a combination of drawer head styles by selecting Small Drawer Front designs (SDF), and Large Drawer Front designs (LDF) in the Quick Order Entry (QOE) software.

There are several options for framing of the drawer fronts in QOE. LDF styles should use "match door framing" to ensure panel alignment with adjacent doors. It is common for SDF styles to use "reduced top and bottom rails" to maximize the height of the center panel. Mitered SDF designs will typically have reduced framing that is style specific.

 - Ogee
 - Square
 - F-007
 - F-1223
- Elite and F-877 framing beads will get regular mullion profile

Glass Retainer Molding

Mullion doors have a clear retainer molding as standard. It is sized for 1/8" glass thickness. For glass thicker than 1/8", use wood retainer molding below.

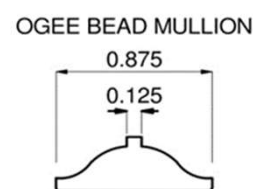

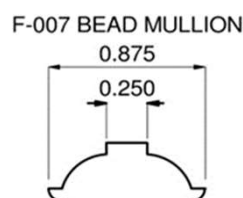

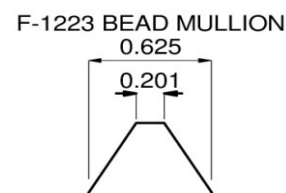

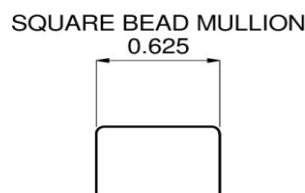

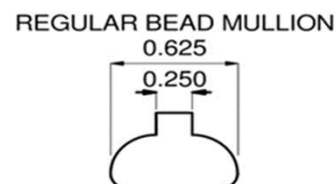

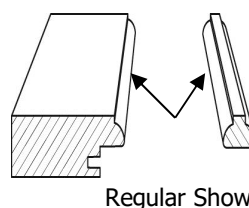

A wood retainer molding is used when glass thickness exceeds 1/8", or when the door is on a radius.

Wood retainer molding is only available on doors with 2-3/4" framing or greater.

Use modification: WOODRETAINER

MULLION PROFILES

All mullion doors must have one of the five beads shown here. These beads will be on the center mullion strips only. Frame of door will be as shown in Door Selection Guide. For mullion door availability, see specific door style page. Arched lite and double arched lite are not available with the ogee mullion.

**GLASS OPTIONS**

STANDARD 1/8" GLASS OPTIONS - listed in Advanceware:

Clear	Seeded
German Antique clear	Tight Wave
Mirror

Double Bow

See exceptions p 1.241

Features 4 radius lites
 Minimum size of 11 5/8" x 11 5/8"
 Clear retainer strip is standard.
 True divided lite option is available on custom quote basis.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

DOUBLE BOW

Double Bow Diamond

See exceptions p 1.241

Features radius and angular lites (12 total)
 Minimum size of 11 5/8" x 14 15/16"
 Clear retainer strip is standard.
 True divided lite option is available on custom quote basis.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

DOUBLE BOW DIAMOND

Vessica

See exceptions p 1.241

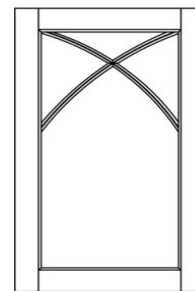

Features 7 radius lites
 Minimum size of 8 5/8" x 15 15/16"
 Clear retainer strip is standard.
 True divided lite option is available on custom quote basis.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

VESSICA

Half Vessica

See exceptions p 1.241

Features 4 radius lites
 Minimum size of 8 5/8" x 12 5/8"
 Clear retainer strip is standard.
 True divided lite option is available on custom quote basis.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

HALF VESSICA

Arched Horizontal

See exceptions p 1.241

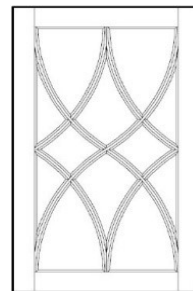

Features 11 radius lites
 Rectangular lites vary with door height
 Minimum size of 11 5/8" x 9 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

ARCHED HORIZONTAL

Hourglass Diamond

See exceptions p 1.241

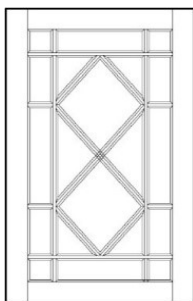

Features 12 radius lites
 Minimum size of 11 5/8" x 14 15/16"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

20 Lite Double Diamond

See exceptions p 1.241

Features 20 lites with 2 diamond lites centered in door
 Minimum size of 12 5/8" x 18 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

20-LITE DOUBLE DIAMOND

Elliptical Mullion

See exceptions p 1.241

Features elliptical shape in center of door
 Minimum elliptical opening is 2-1/2" x 5"
 Must specify size of elliptical opening
 Minimum size of 12 5/8" x 13 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

ELLIPTICAL MULLION

X-Lite Mullion Door

See exceptions p 1.241

Diagonal mullion pattern
 Minimum size of 8 5/8" x 8 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

X-LITE

X-Lite Solid Hub Mullion Door

See exceptions p 1.241

Features solid center hub
 Hub diameter varies from 3" to 3-1/4" depending on framing bead
 Minimum size of 9 5/8" x 9 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

X-LITE SOLID HUB

X-Lite Open Hub Mullion Doors

See exceptions p 1.241

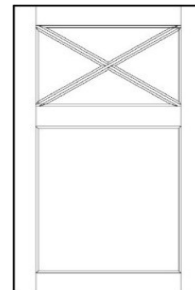

Features open center hub.
 Hub diameter varies from 3" to 3-1/4" depending on framing bead
 Minimum size of 9 5/8" x 9 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

DIAMOND

X-Lite Panel Mullion Doors

See exceptions p 1.241

Features X-mullion top panel with solid lower panel
 Minimum size of 8 5/8" x 15 5/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.
 Glass will be shipped installed in door.
 Order these doors on the accessory line under the cabinet.
 Be sure to include a finished interior modification if needed.

DOUBLE - DIAMOND

Double X Mullion Doors

See exceptions p 1.241

Ogee not available

Features diagonal mullion pattern
 Minimum size of 8-5/8" x 13-1/8"
 Clear retainer strip is standard.
 Prepped for glass thickness of 1/8".
 Must order glass separately.

 Per door charge.

203 Routed Peg

Center of rout is placed 1-3/16" from inside of framing bead.
 Add 2 days to lead time.
 Per door charge.

Distressing

Rendering represents example only.
 Distressing is a random treatment;
 Appearance of distressing will vary from piece to piece.
 A physical sample should be purchased before placing an order.

***Plywood will not be distressed. We recommend wainscot finished ends.**

Description of Levels

Level 1

A random distribution of nicks and impressions.

Level 2

A random distribution of nicks and impressions, plus simulated worm holes, razor cuts and cut joints.

Level 3

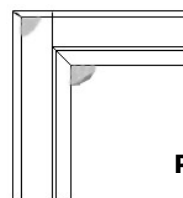

A random distribution of nicks and impressions, simulated wormholes plus powder beetle damage, rasp marks and cracks.

Antiquing (Rub-Thru)

Antiquing is a post-stain random sanding of corners and edges exposing the natural wood which is then varnished. This gives the effect of the stain color being rubbed through to expose the natural wood color. It provides a worn look to complement one of our distressing packages. Combine this with the wear sanding option to achieve a heavier level of antiquing.

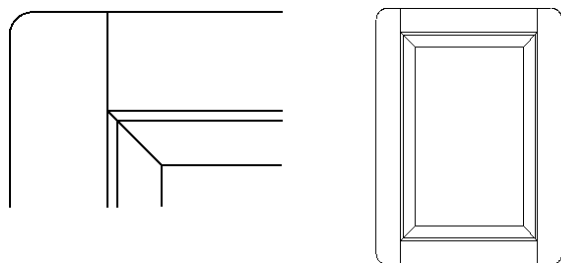

Per door charge.

Wear Sanding

Per door charge

Radius Corners

Specify 1/8", 1/4", 1/2", or 1" radius.
 Available with B-2, C-2, LC-2, L-059, O, L149,
 machine edge and PRS-2 edge profiles only.

Per door charge

This option provides an aged appearance to unfinished doors and drawer fronts.

On raised panel designs, sanding is applied to the corners of the panel and the outside corner of the framing.

Flat panel, mullions and frame only designs will receive sanding on the outside corners of the frame only. Sanding will be random and each corner will vary with appearance.

Wear sanding is available with all published panel raises and edge profiles.

The wear sanding option is available as a stand alone feature and is also offered with distressing as described above.

Distressing & Antiquing

There are different levels of distressing and antiquing available to suit your customer's needs. Custom distressing or antiquing is not available. We offer only our standardized interpretation of these treatments. We recommend not using a sample chip to sell distressed or antiqued cabinetry. Please order a sample door for your customer's approval.

Where distressing and antiquing occur:

Distressing and antiquing typically occur on the doors and drawer heads of the cabinetry. There are some cases where the different treatments are found on the cabinet face frames and moldings. The type of door style is the determining factor.

Overlay Styles

- No distressing on face frames
- No antiquing on face frames
- Distressing on hardwood moldings
- Antiquing on the edges of the hardwood moldings

Plain Inset & Beaded Inset Styles

- Distressing occurs on face frames and all hardwood molding.
- Antiquing occurs on inside corners of face frame and edges of hardwood molding.

Important information about distressing and antiquing:

Finished sides and back panels will not receive distressing or antiquing. A guideline for this is: if it is plywood, then there is no distressing or antiquing.

If you desire antiquing or distressing on the finished sides and back panels you will need to order either an applied door or a wainscot side. (See p. 0.42-0.43) for the different types of wainscot).

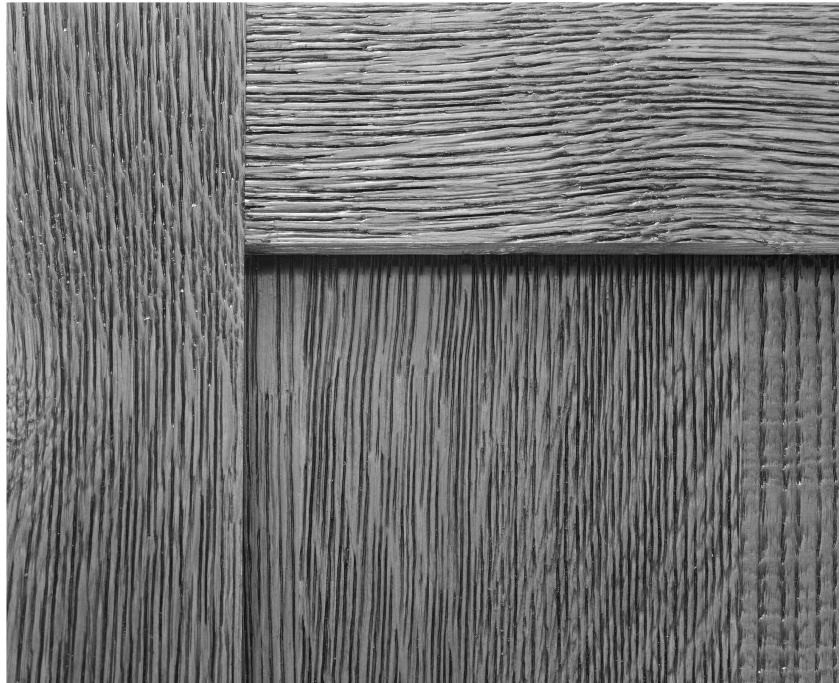

Keep in mind that distressing and antiquing are random applications designed to convey an aged appearance. Most distress marks will not typically appear on the raised panel portion of doors or drawer heads.

The extent to which a distressing level impacts the look of the finished product will vary depending on wood species, door style, and the selected finish. **Please order a sample door for your customer's approval.**

Remember: all treatments are random.

Typically, there will not be any treatment on the panel raise.

WEATHERED GRAIN OPTION

The weathering treatment is available on Quarter Sawn White Oak only. This treatment removes softer portions of the wood surface to give a highly textured look and feel. Framing beads and center panel grooves will be smooth. Only the face and outside edge of the doors and drawer fronts will be weathered. The weathered grain treatment is only available on the following edges: ME, L-1160, L-034 and L-149 (see p. 1.235). Available door styles are Bristol, Dover, Olympia, Quaker, Alexandria, Amesbury, Shaker, Stockholm, Prestwick and Crossbuck. Square Recessed and Square Raised are also be used but not all options are available. (See above or contact the Order Desk to confirm availability of your selections.) Plain inset is available and will have weathered face frames.

Stained finishes will have greater variation because the product cannot be sanded after the weathering process. A 5° flat sheen top coat is standard, with an option for a 15° low sheen.

The following 8' moldings are available weathered: B09 beaded panel, #13 batten, #14 scribe, #381 baseboard, #538 Shaker crown, 31126 Shaker crown, #1529 reverse Shaker crown, #1809 scribe, #2316 scribe, #2317 scribe. Plywood parts are not available with the weathering treatment.
